

As an NYCwireless board member, I would like to ask that the FCC support and facilitate mesh networking on behalf of community wireless groups. In addition, I request that the FCC not obstruct or jeopardize, in any way, the primary function in this band of low-power transmissions at the community level and not to establish a first-in-time, first-in-right site licensing regime for high-power in a so-called "unlicensed" frequency. The future of unlicensed spectrum is vital for content development, networking and information-sharing by local communities nationwide and worldwide and we urge the FCC to take this into consideration when making future spectrum decisions. Thank you.
